

$$\frac{\partial u}{\partial t} = [b(x) - a(x)] \frac{\partial u}{\partial x}$$

**retrograde
velocity**

**anterograde
velocity**

A1

k = 0.0

A2

k = 0.25

B1

k = 0.0

B2

k = 0.25

C1

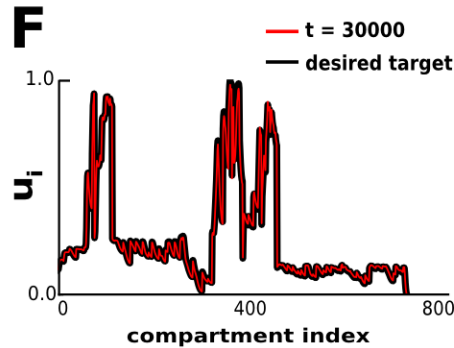

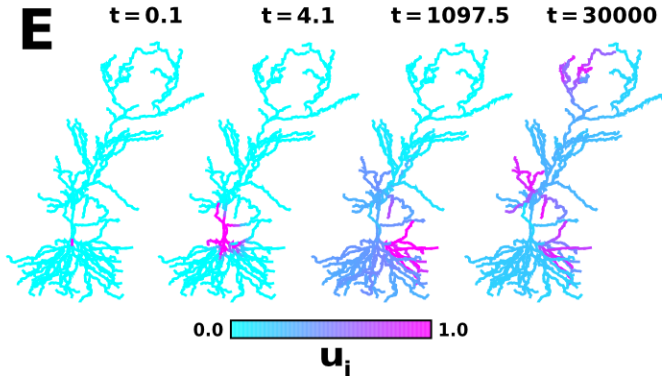

k = 0.0

C2

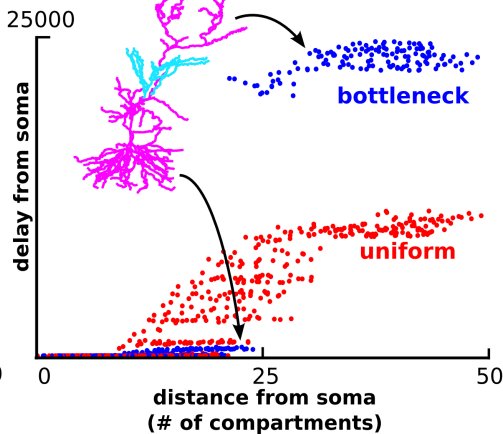

k = 0.25

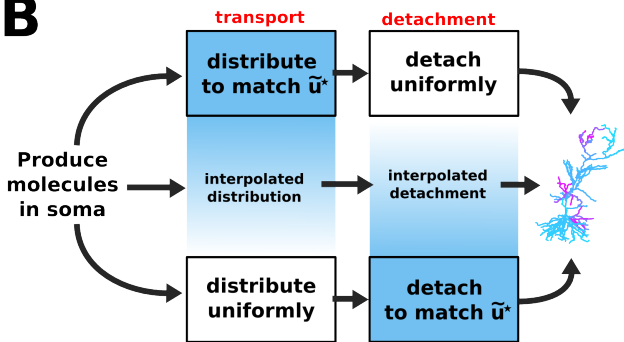

A

example of a transport bottleneck:

**B****C****D****E****F**

A**B****C***steady-state***D***convergence*

A**production****B** I_h (Magee, 1998) I_A (Hoffman et al., 1997)**C**

Model, Averaged Data

**D**Model, Single Cells
(variable production rates)**E**

Model, Perturbations

slow detachment
from microtubules

A

distal
transport

detachment on
a faster time-scale

B

high
low
 u_{ss}^*

C

distal & proximal
transport

D
